

YATSI

Young Academy of
Technology, Science
and Innovation

YATSI – The *Young Academy of Technology, Science, and Innovation* is a new Danish academy exclusive to the natural and technical sciences targeting elite scientists and STEM professionals working in both academia and industry. Established in the spring of 2023 with funding from the VILLUM Foundation and support by the Danish Academy of Technical Sciences (ATV), YATSI now publicly calls for its inaugural round of memberships.

Purpose and expected impact

YATSI is intended to offer a productive forum for early-career professionals residing in both academia and industry, which themselves are willing to raise their voices in the public debate. Furthermore, YATSI will work to help foster collaboration, ease earlier adoption of new knowledge and

technology, and bridge the gap between industry and academia.

As such YATSI aims to:

- Foster the exchange of scientific ideas and interdisciplinary knowledge between academia and industry ranging across a multitude of STEM fields
- Create scientific leadership
- Strengthen strategic collaborations as well as science-based innovation and entrepreneurship
- Amplify the public voice of young scientists and STEM professionals in Denmark and internationally
- Support early-career professionals from the natural and technical sciences in establishing professional networks across both academia and industry.
